It is a simple clay model that has been attributed a Vertex Edges Material (which I will get into later).. This will get you started on your way to using IES Lights Wireframe Tutorial Vray I have used a wireframe type material, which I like to use in these clay render type solutions, so that provides a nice “work in progress” image, so we can analyse what needs to be tweaked and adjusted.. You will need to download two things: IES Lights – IES Light Viewer – IES Generator – (not necessary to install) What is IES Lighting IES stands for Illuminating Engineering Society.

IES standard file format was created for the electronic transfer of photometric data over the web.

## vray light material

You can think of it as a digital profile of a real world light In 3d software like 3ds max it can be used for creating lights with shapes and physically accurate form.

follow the steps below Beginning When wondering around 3D sites as Evermotion, Ronenbekerman, CgArchitect and others, I noticed that the majority of render images tend to use IES lighting.. Inserting a IES Light First thing you should do is download IES lights from, it has an extensive library of IES files with different categories.. IES lighting just seems to add much more life than the simple lights available in Vray.. Learn how to download, view and create photometric IES lights using 3ds Max's Free Light and VRay's IES Light.. (Source cgarena com) SketchUp Importing to 3D Studio Max I tend to model simple things in SketchUp, just because of its ease of use and also speed, it handles the job for the majority of things that I do.. The model I have supplied is a simple one that I have modeled in Sketchup and brought into 3D max, it is of a project we are working on for a hairdresser.
